Professional Experience

Panasonic Avionics Corporation

Irvine, CA

Senior Data Software Engineer | Data Scientist II

May 2022 - Present

- Engineered and maintained production-grade ETL pipelines using **AWS Glue, Lambda, SNS/SQS, S3, Athena, and Python/PySpark** to ingest and process in-flight connectivity data across 20+ international airlines, enabling reliable customer-facing analytics and operational reporting dashboards.
- Migrated legacy reporting workflows to scalable AWS-based processes, **automating daily, weekly, and monthly** customer report delivery through **AWS SES** and reducing manual reporting effort by an estimated **10+ hours per month**. Implemented compression and delivery improvements for large reporting payloads, reducing file sizes by up to **60%** and improving downstream delivery.
- Supported 24x7 production reliability as part of an on-call rotation by triaging 5+ production alerts per month using **CloudWatch** and **PagerDuty**, **performing root cause analysis**, and executing data backfills to restore reporting completeness.
- Investigated and resolved data quality issues across connectivity sources using **SQL, Athena, PySpark, and CloudWatch logs** to reconcile inconsistencies and improve confidence in downstream analytics.
- Authored and maintained 10+ **Confluence** pages, including pipeline documentation, architecture diagrams, operational runbooks, and data dictionaries, improving data discoverability, knowledge transfer, and onboarding support for new engineers.
- Collaborated cross-functionally with product, architecture, and engineering teams to translate business requirements into scalable AWS data pipelines.

Project Experience

Personal Website [\[LINK\]](#)

[\[GitHub Link\]](#)

Technologies: *HTML, CSS, JavaScript, GitHub Pages*

January 2026 – Present

- Designed and developed a single-page personal portfolio website using vanilla HTML, CSS, and JavaScript to showcase professional experience, education, certifications, technical skills, and external links in a centralized online profile.
- Deployed the site through GitHub Pages, enabling automatic publishing from the repository's master branch and reducing deployment overhead by eliminating the need for a separate build step or external hosting service.

Education

California State University, Fullerton

Master of Science in Computer Science

Fullerton, CA

August 2025 – Fall 2027

California State University, Fullerton

Bachelor of Science in Computer Science

Fullerton, CA

January 2020 – January 2022

Relevant Coursework

Data Structures & Algorithms

Database Systems

Computer System Architecture

Software Architecture

Machine Learning and Artificial Intelligence

Web Front End Engineering

Operating Systems Design

Distributed Systems

Network Security

Data Science and Big Data

Algorithm Engineering and Software Engineering

Web Back End Engineering

Skills

Programming Languages: SQL, Python (PySpark, Pandas), C++, Java, Javascript, R, HTML, CSS

Data Engineering & Analytics: ETL Pipelines, Data Modeling, Data Warehousing, Workflow Orchestration (Airflow), RESTful APIs

Cloud & Big Data Technologies: AWS (Glue, Lambda, Athena, S3, QuickSight, Redshift)

Databases: MySQL, PostgreSQL, DynamoDB, Redis

Version Control & CI/CD: Git, GitHub, GitLab, Jenkins

Languages: English (Fluent), Spanish (Fluent)

Certifications, Honors & Awards

- [CompTIA Security+](#)
- AWS All Builders Welcome Grant

December 2025 – December 2028

October 2022
